*******ACADEMIC QUALIFICATION*******

▪ **Doctor of Philosophy (PHD) in medical research (2023-current)**

University of Tasmania (UTAS), Menzies institute

▪ **Doctor of Pharmacy (2015-2021)**

Mashhad University of Medical Sciences (MUMS), Mashhad, Iran

GPA: 17.28 (on the 20.00 scale, equals to A)

▪ **IELTS (academic – date: 2022-Jan-08)**

Overall Score: 8

L:8.5, R:9, S:7, Wr:7

*******INVENTION REGISTRATION*******

Title: "Anti-inflammatory capsule containing ethanolic extract of Thymus Kotschyanus plant"

- Registered at: Emblem of the judiciary of Iran and Mashhad university of medical sciences
- Date: 2022-Aug-08

*******PUBLISHED JOURNAL ARTICLES*******

1. Study 1-Published

Title: Multisite chronic pain and incident multiple sclerosis: A prospective cohort study

- Published as first author in *Brain, Behavior, and immunity*: (Impact Factor: 7.6; Q1, Ranked 25th out of 314 journals in Neuroscience and 12th out of 288 journals in psychiatry)

2. Study 2-Published

Title: Chronic Musculoskeletal Pain and Risk of Incident Parkinson's Disease: A 13-Year Longitudinal Study

- Published as first author in *Movement disorders*: (Impact Factor: 7.4; Q1, ranked 1st in Movements Disorders and 16th out of 281 journals in Clinical Neurology)
- This work also has gained Media attention with a featured article in physician's weekly which is disseminated to healthcare professionals at the point of care (<https://medicaldialogues.in/neurology-neurosurgery/news/chronic-musculoskeletal-pain-independently-linked-to-incidence-of-parkinsons-disease-study-139638>).

3. Study 3-Published

Title: Association of chronic pain and analgesic with the risks of Parkinson's and Alzheimer's disease

- Published as first author in *Geroscience* (Impact Factor: 5.9; Q1, leading top journal in geriatrics and gerontology with the ranking of 7th out of 73 journals in this field).

4. Study 4- Published

Title: Evaluation of the efficacy of Thymus kotschyanus extract as an additive treatment in patients with ulcerative colitis: a randomized double-blind placebo-controlled trial

- Contributed as first author and is published in *Inflammopharmacology* (Impact Factor: 5.3; Q1, ranked 13th of 106 in toxicology field)

5. Study 5- Published

Title: Serological evidence linking viral infections to incident risk of hip and knee osteoarthritis

- Contributed as co-first author and is accepted in *bone and joint research journal* (Impact Factor: 5.1; Q1, leading top journal in orthopaedics with the ranking of 6th out of 139 journals in this field).
- This work was presented in OARSI international congress, main osteoarthritis research and treatment congress, in 2024 in South Korea and is indexed in Osteoarthritis and cartilage journal (Impact Factor: 9, Q1, 2 of 139 orthopaedics journal)

6. Study 6-Published

Title: Non-HDL cholesterol and long-term follow-up outcomes in patients with metabolic syndrome

- Contributed as first author and is published in *lipids in health and disease* (Impact Factor: 4.2; Q1)

7. Study 7- Published

Title: Therapeutic potential of RAS prenylation pharmacological inhibitors in the treatment of breast cancer; recent progress, and prospective

- Contributed as co-first author and is published in *journal of cellular biochemistry* (Impact Factor: 2.8; Q2)

8. Study 8- Published

Title: Predictive value of lipoprotein(a) in coronary artery calcification among asymptomatic cardiovascular disease subjects: A systematic review and meta-analysis

- Contributed as co-first author and is published in *nutrition, metabolism and cardiovascular diseases* (Impact Factor: 3.7; Q3)

9. Study 9- Published

Title: Aprepitant, fosaprepitant and risk of ifosfamide-induced neurotoxicity: a systematic review

- Contributed as first author and is published in *cancer chemotherapy and pharmacology* (Impact Factor: 2.3; Q3)

10. Study 10- Published

Title: Correlation between osteoprotegerin and coronary artery calcification in diabetic subjects: a systematic review of observational studies

- Contributed as first author and is published in *BMC cardiovascular disorders* (Impact Factor: 2.3; Q2)

11. Study 11- Published

Title: Prognostic Value of Circulating Osteogenic Proteins for Stratifying Coronary Artery Calcification Risk

- Contributed as first author and is published in *international journal of the cardiovascular academy*

12. Letter to editor- Published

Title: Reply to: "Chronic Pain and Parkinson's Disease: Causation or Confounding?"

- Contributed as first author and is published in *Movement disorders*: (Impact Factor: 7.4; Q1, ranked 1st in Movements Disorders and 16th out of 281 journals in Clinical Neurology)

*******ADDITIONAL CONTRIBUTIONS*******

Contributing as a clinical investigator in Tasmania Parkinson's Project:

- ❖ Clinical assessments of patients using Movement Disorders (MDS)- Unified Parkinson's Disease Rating Scale, Part III (UPDRS-III): Conducting motor examinations for patients with parkinsonism who have been diagnosed for less than five years in the clinic.
- ❖ Member of the Menzies Institute for Medical Research Inclusion, Diversity, and Equity (EDI) committee (2024 – current)
International peer leader at the University of Tasmania (2023-current) – Casual role
Assisting new international undergraduate and postgraduate research students settle in studies in Tasmania.
- ❖ Abstract reviewer for Australian Epidemiological Association 2025 scientific meeting.

*******CONFERENCES*******

- 57th Public Health Association Australia (PHAA) Conference: Oral Presentation, Hobart (Presented), September 2024.
- College of Health and Medicine (CoHM) Research Showcase 2024: Oral Presentation, Hobart (Presented)
- 57th Australian Association of Gerontology (AAG) Conference: Oral Presentation, Hobart (Presented), November 2024.
- AAG TAS Division: Oral Presentation, Hobart (Presented), February 2025.
- Australian Pain Society (APS): Oral Presentation, Melbourne (Presented), April 2025
- Australian Osteoarthritis (OA) Summit, March 2025
- Osteoarthritis Research Society International (OARSI) World Congress 2025: Abstract accepted and presented by co-author, Incheon, South Korea, April 2025.
- Second international conference on cardiology in 2022 in France: Online presenting

*******FUNDING/AWARDS/RECOGNITION*******

- Ten of the best Menzies awards, 2025.
 - The 'Ten of the Best Award' is an important means by which the Menzies Institute for Medical Research encourages, recognises and rewards the outstanding performance of staff and students who publish high quality papers. The Ten of the Best Award highlights excellent research led from Menzies that

aligns with the University's mission to make a difference for Tasmania, and from Tasmania to the world; and Menzies' purpose to perform internationally significant medical research leading to healthier, longer and better lives for Tasmanians.

- Australian Association of Gerontology (AAG) Tasmania bursary: Awarded \$350, November 2024.
- Menzies Top Up Scholarship, March 2025: \$7,500 per annum from award of top-up to (a) thesis submission date with meeting the following criteria:
 - Undertaking a higher degree by research at Menzies with a research focus on conditions and diseases that relate to aging
 - Academic excellence - outstanding progress in PhD at Menzies
- College of health and medicine Tasmania graduate research scholarship, March 2023: \$33,511 per annum.
